# Do a cybercheck

Discover Your Digital Safety Readiness

Get Started

How It Works.

STEP 1 OF 2

# Who are you?

Select your role to route to the appropriate digital safety assessment question bank

**Educator / Staff**

Teachers, admins, and school support members

**Student**

K-12, college, and university students

Continue to Check

Your response determines the question focus area.

# Safety Framework Check

This questionnaire dynamically adapts based on your answers to evaluate your alignment with the key pillars of our Cyber Safety Framework.

**10–15 questions**
Saves your time with targeted and smart conditional paths

**About 5–10 minutes**
Fast, interactive assessment of your overall cyber readiness

**Results provided at the end**
Immediate, actionable dashboard of your posture with tips

## An email from “IT Help Desk” says your account will be locked today unless you sign in using its button. What is the safest first step?

Your answer determines the next difficulty

A Use the button, then change your password afterward

B Reply to the email and ask whether the warning is real

C Open the school portal directly or contact IT using the directory ✓

D Forward the message to classmates to see what they think

ASSESSMENT RESULTS

# Your Cybersecurity Readiness

A personalized view of your current strengths and next learning priorities.

Completed today

Overall Estimated Level: Developing

## Developing

You have a solid base. Focused practice in privacy, phishing, and reporting will build stronger everyday habits.

Foundational — Proficient

### Readiness by domain

Results reflect your responses across five core areas

Foundational — Proficient

| | |
|---|---|
| **Account Security** — Strong password and sign-in practices | Proficient |
| **Phishing Awareness** — Building confidence with suspicious messages | Developing |
| **Student Data Protection** — Core privacy habits need reinforcement | Foundational |
| **Device Security** — Consistent updates and device safeguards | Proficient |
| **Incident Reporting** — Improving when and where to report | Developing |

## Recommended Areas for Improvement

Start with these short, practical resources based on your results.

3 resources selected for you

**Phishing Awareness**

### Spot the Phish

Practice checking senders, links, and urgent requests before responding.

8 min · Interactive — Start →

**Student Data Protection**

### Protecting Student Data

Learn simple rules for sharing, storing, and disposing of student information.

12 min · Mini course — Start →

**Incident Reporting**

### Report It Early

Use a clear three-step path to document and escalate suspicious activity.

6 min · Scenario — Start →
